

# You want to embrace and shape **changes**?

Are you a graduate or young professional and want to start a **career as successful project manager / consultant**?

Do you distinguish yourself by a **willingness to learn**, as well as a **focus on problem-solving** and **results**? Do you want to develop and implement solutions in **complex projects** and achieve **goals**?

Do you want to continuously **develop** yourself and get qualified as **project manager** and **team leader**?

For our challenging projects we are looking for consultants and managers with expertise and passion, who will support our customer projects to consistently and efficiently attain their goals.

## Project Coordinator

The [bu:st] group, with its approximately **130 employees**, is a successfully growing consulting company, headquartered in **Germany**, with an office in **Greenville, SC**. A high level of innovative strength, flat organizational structures and short decision making processes characterize our **open corporate culture**. Our core competence is **project management and consulting** in complex development and manufacturing projects. Our customers come from the **automotive, marine, construction, health care, and aerospace industries**.

### Our offer

- Responsibility for your own exciting and diverse projects in an international environment
- Intensive mentoring and instruction to learn your projects
- Individual career and development opportunities, as well as professional education through training programs and the qualification as senior consultant, team leader or product manager
- An attractive compensation system with various and tailored individual benefits
- An outstanding team culture with short communication paths to the top
- A modern and innovative work environment

### Your responsibilities

- Customer support and advice in the management of complex development projects
- Installation and implementation of efficient project management (e.g. communication, scheduling, reporting, quality, change management)
- Analysis, optimization, and implementation of processes, structures and organizations

### Your profile

- College degree, process and technical understanding
- Communication skills and team-orientation
- Analytical thinking, structured problem-solving, and goal oriented work discipline
- Organizational skills, proactive, and willingness to travel
- Very good MS Office knowledge
- German language skills are a plus

**Are you interested?** Then please send us your application, including your salary expectations, as well as the earliest possible starting date. Please let us know how you heard about us.
